

Fisher Hamilton®

# P-Frame

*Adaptable Laboratory Furniture*

P-Frame service chases are available in wall and island configurations. Slotted uprights can be added above wall and island assemblies to support overhead storage shelves.

Service chases are equipped with full width access panels. Panels can be removed without tools for instant access to service lines.

Work surfaces can be supported by fixed or adjustable height P-Legs. Fixed height legs are available in 30" and 36" heights. Adjustable height leg assemblies are infinitely adjustable from 30" to 36".

## ***The perfect combination of flexibility and value...***

The proven P-Frame design concept delivers flexibility, performance and economy. P-Frame utilizes modular, adjustable height components to adapt to changing personnel, equipment and procedures. The P-Frame service chase is equipped with full-width removable access panels. Suspended and mobile base cabinets are easy to relocate, providing storage flexibility and the ability to create knee or equipment spaces. Heavy-duty adjustable height steel shelves securely support heavy loads and provide maximum storage capacity above the work surface. The end result is an adaptable laboratory furniture system providing an optimum combination of performance and value.

Base cabinets are available in suspended, mobile and floor-mounted configurations in a wide variety of door and drawer configurations.

Steel shelving is height adjustable in 1" increments and available in 8", 12" and 18" depths.

P-Frame components are finished with a durable, chemical-resistant powder coat finish. High-performance epoxy resin and phenolic resin work surfaces are available.

## **Solutions for the Technical Environment**

When it comes to choosing laboratory furniture, look to Fisher Hamilton. As the industry leader, Fisher Hamilton offers the most comprehensive selection of product lines, options and accessories in the world today.

The markets served are as diverse as the products manufactured. We work very closely with the educational, industrial and health care markets and are actively engaged in the development of new technologies and products to better serve these ever-changing laboratory environments.

The many lab furniture lines that can be drawn upon to build the optimal system include:

**Wood Casework**
